

Ivermectin, the horse dewormer

By Mariann Cooper

(This article may shock you and you'll wonder why you never saw this on the news. It's the same reason they didn't publicize how dangerous the C-19 vaccines were. The only place you'll find this information is on the internet. We tried to warn people through the FAN back in 2020-21, but the media was more powerful, and why would our government hurt us? These doctors are taking a big risk to get this information to the people, and they're paying a price for it!!)

I just listened to the following video by Dr. William Makis, M.D., a most infamous doctor in Canada. It's not word for word and I definitely am not sure on the spelling, but the general idea is there.

Dr. Makis: "In the last three months, I've been threatened with 83 days imprisonment, my financial accounts have been frozen by Alberta Government and Health Services, been extorted for \$140,000. I avoided prison by paying \$10,000 in fines, and they then informed me they want another \$45,000 in contempt of court.

"I will tell you about ivermectin, fenbendazole, mebendazole and how they're used in cancer. The persecution of doctors has been absolutely unbelievable; Dr. Charles Hobb(?) and Dr. Stephen Malthause(?) are two more who were affected.

"I just testified at the National Citizens Inquiry on kids who are vaccinated and are now getting cancer. It will be denied for years! Some of these kids are my patients.

"The 'Died Suddenly' phenomenon, turbo cancer, and extremely aggressive cancers after taking the C-19 vaccines, I've spent two years talking about it. I lost my Twitter account and was banned by the previous Twitter management. In the last two years I've shifted focus to treating the conditions and for solutions. These shots have been so destructive. Everyone knows someone who was damaged through heart attack, cancer, stroke, blood clots, all kinds of neurological and autoimmune diseases.

"Right now I'm running the largest Ivermectin Cancer Clinics in the world, with over 1000 patients. The college has threatened me and told me to take down all my social media accounts. Dr. John Campbell was also hacked, who I had an interview with about cancer and ivermectin. The interview is still available on YouTube if you want to see it.

"Twitter deleted 44,000 of my posts, deleted about Alberta Health and the corruption, my Ivermectin and cancer posts. In a couple of days, they gave me back my account and restored my posts. Then they froze my account of \$140,000, and raided my account for thousands of dollars. This is out in the open in Canada.

"Speaking tonight about re-purposed drugs. Ivermectin is really miraculous and works for Covid-19. It works for influenza and will work for H5N1 also which is coming up. Some of the results were discovered by accident, through literature, and people sending testimonials. People took it for cancer and their psoriasis cleared up. Lyme Disease was cured. A person who had suffered Lyme Arthritis for years, after a few weeks of Ivermectin, that cleared up. People are getting relief in even Stage 4 Cancer.

"Ivermectin was designed for one purpose, but discovered it can be used for something else off-label. Ivermectin Cream 1% was approved by the FDA to treat Rosacea. The horse paste is 1.87% and can be used for any inflammatory or autoimmune skin condition. It works for cystic acne and eczema, and will clear completely psoriasis and skin cancers. I have tons of testimonials of people who had squamous cell, basil cell carcinomas, and melanomas. Applying ivermectin twice

a day, in a couple of weeks you can see skin lesions start changing, get smaller, and in a couple of months they fall off. One patient put it on tongue cancer and she could feel the lesions shrinking after a few weeks. Breast lumps would shrink, even lymphomas and cysts will shrink as ivermectin gets absorbed through the skin. Stock up on them! The family doctors are afraid of it.

"Rheumatoid Arthritis will respond to oral Ivermectin as well as juvenile rheumatoid arthritis. A 16-year old ballerina had Spondelitis that responded to Ivermectin with a low dose of 12mg or 24mg.

"Ivermectin has an affect on Parkinson's and Alzheimer's Disease. All research was scrubbed from Google that has been studied in the Middle East. Go to duckduckgo to find it. For Parkinson's we used high doses of Ivermectin 60mg and 72mg, and patients have responded and improved in movement. One patient was barely mobile taking maximum doses of the standard treatment. With high doses of Ivermectin, they were able to play golf again after many years being disabled.

"A Alzheimer's patient, 90 years old, started on a low dose 12mg. After a couple of doses they are recognizing family members, memories are coming back, so they start reminiscing. Their cognitive ability starts to come back. Take 12mg - 24mg for 4-5 days, just try it! One patient was taken off Hospice because they were doing so well. After suffering many years, you get them back mentally with humor and memories. It's safe! Zero risk! You can't buy the precious healing. Some people are bedridden, not responsive, and the next day they're up and about! (See my Substack - for those who are computer literate!)

"For cancer we do two forms at once: Ivermectin and Fenbendazole or Mebendazole. Thalidomide is like Ivermectin."

These pastes are available at any farm store for about \$10 a tube. The pills can be ordered from Tmeds.org, Urban Meds, and @Amy N Shane Harris.

If you want to research yourself, Google will not lead you to controversial sites. You need a non-biased search engine like duckduckgo, Brave, Ecosia, etc. Look at the web address of the choices, and view the ones that are not health department related.

There are many sites where people have healed from Stage 4 cancer. If you want emails forwarded to you, email me at mariann@copiesfruitport.com and I will forward what I find to you. There are lots of sources fighting cancer around the world, and they are sharing with us. Here is one site you can look up right now:

Robert W. Malone MD, MS  
December 4, 2023

As the COVID crisis winds down, we must hold those people responsible for the creation and release of this manufactured virus accountable. That includes people in the administrative state that funded the gain-of-function research. That made the creation of this virus possible.

As a first-person witness to what happened in the White House during 2020, Peter Navarro is uniquely positioned to comment on how NIH and Health and Human Resources (HHS) lied to those in Trump's administration as to how this virus was created. They knew. They lied. They must be held accountable.
